Have You a Disordered Stomach and Liver?

Do you start the day feeling that the whole world is against you? You cannot hope to "make good" under these circumstances. Nobody can. You must have a clear brain and every organ in perfect trim to do justice to yourself.

Dr. Pierce's Golden Medical Discovery

Will Bring Quick Relief

Dr. R. V. Pierce found years ago that a glyceric extract of Golden Seal and Oregon grape roots, queen's root and bloodroot with black cherry bark, would aid in the assimilation of the food in the stomach, correct liver ills and in nature's own way enrich the blood, tone the entire system and consequently help in the restoration of perfect health. Many who have used Dr. Pierce's Golden Medical Discovery testify that they have been restored to health when suffering from stomach and liver ills. Let this famous old medicine start today to lead you to health and strength.

Now-if you prefer-you can obtain Dr. Plerce's Favorite Prescription tablets of your druggist at \$1 per box, also in 50c size or send 50 one-cent stamps to R. V. Pierce, Buffalo, for a trial box.

You can learn all about hygiene, anatomy, medicine, etc., from the People's Common Sense Medical Adviser, by Dr. R.V. Pierce, a newly revised, up-to-date edition of which is now offered, in cloth covers, post-pad, for 31 cents in one-cent stamps, to cover cost of wrapping and mailing only. Address, Dr. Pierce's Invalids Hotel, Buffalo, N. Y.

Don't be poisoned by sluggish bowels. Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. Sugar coated, tiny granules.

Cooking As A Fine Art Woman is Fast Demanding Modern Tools With Which to Work, Just as Man Has Done. By Dorothy Dia-MONG the many things that Kan-

A sas does well is to teach aspiring girls how to become blue ribbon cooks. Recently a Kansas woman engaged one of the graduates of the domestic science course to do culinary stunts in her kitchen, and thereby congratulated herself too soon. For said the new cook:

"I can't make pastry without a marble slab. "I must have a spatule.

"Also an oven thermometer, some good scales, a bread mixer, rotary cream whip, a glass rolling pin and an egg separator."

The graduate is now looking for another situation.

But why? Where does the joke come in? Why is it to laugh?

The expert cook was simply demanding the tools of her trade, the tools she must have if she did good work. Nobody would see anything amusing in a carpenter demanding a hammer, and a saw, and a plane and rule if he were starting to build a house. Nobody would hugh if a plumber asked for a soldering iron, and a wrench when he went to fix a pipe. Nobody smiles if a painter calls for various sizes and kinds of brushes when he fares forth to paint a barn.

Cooking is a Fine Art.

Cooking is a Fine Art. Why then is it so ridiculous for a cook to demand the proper instruments with which to execute her art? Certainly no one will deny that cooking is a fine art, and an exact science, to boot, and the reason we have so much had cooking is because the average cook is forced to work without the

The cooking school graduates' de-mands seem laughably absurd to the average reader, yet a dispassionate consideration of them will show they are absolute necessities to turning out

are absolute necessities to turning out good work.

That we should find anything to laugh about in the cook wanting her proper tools merely shows, that we are ignorant, blundering fools, still sunk fathoms deep in the slough of ancient superstitions that make us think that anything is good enough for a woman to work with, and that it doesn't make any difference about saving time or labor.

labor.

The man has the latest model of self binders and reapers and plows on his place if he's a farmer; or if he is a banker he has patent adding machines; or if he is a merchant he has installed the swiftest and most perfect automatic bundle carriers on the market, or if he is a manufacturer he has the finest high scared machinery that money will buy. He doesn't let his employee hungle along with out of date tools.

If Men Had to De Cooking. If Men Had to Do Cocking.

The criticism is frequently made that somen show their lack of intelligence and executive ability by the fact that there has been less improvement in the domestic art than any other, and that while men have progressed from plowing with a crooked stick of wood to the nutomboble plow, women are practically keeping house just ikle wrandmothers did a century and. It is true that the woman's kitchen hasn't kept pace with the man's factory, and that women still use archaic methods, and tools in their work but it is to be remembered that it is man who carries the pure that it is man who eneries the pure-and than when any labor saving de-vice was to be bought he bought it for himself, and not for his wife.
